

URI Participation Badge

What to do to qualify for an Unnatural Resources Institute and Fair Badge.

(An unnatural resource is something that has been used once or a scrap from a larger project. It would be headed for a landfill if someone doesn't have a new idea for it.)

1. List ten products made using recycled materials.
2. Find out about your county and town's recycling plan and what they are doing to implement it. Local contact directory: <http://p2pays.org/localgov/newaste.html>
3. Find out about your state recycling plan and some factoids on recycling. <http://www.re3.org/doc/Facts.pdf>
4. Learn about reuse-recycling by making something out of unnatural resources. www.unnaturalresources.org can help with examples.
5. Enter the Eastern Carolina Unnatural Resources Fair or have an unnatural resources event among your group or groups. Our workbook for having events is available on the www.unnaturalresources.org website.
6. Tell someone what you have learned about recycling. Have fun helping us spread the word about reusing and recycling.
